

Human induced climate change will cause the extinction of our species.

Technologically advanced aliens will colonise our planet (and we'll all die).

THE FUTURE

Humans will invent interstellar travel and
colonise the universe.

Humans will become extinct after a nuclear war.

Artificial intelligence will exceed human intelligence and we will become their slaves.

THE FUTURE

Humans will be wiped out by a disease.

The zombie apocalypse will decimate our global population.

THE FUTURE

The earth will be destroyed by a meteor.

Humans will be forced to leave earth after pollution becomes too great to survive.

Wealthy humans will leave the polluted earth and build a new orbiting habitat, leaving everyone else to suffer and die.

A major crop failure will cause the extinction of the human race except for a few survivors.

Humans will become sterile after an accident
and we will no longer be able to reproduce.

Humans will be able to transfer our consciousness into other forms and so become immortal.

THE FUTURE

Humans will conquer sickness and death and
never age or die.

THE FUTURE

Humans will invent time travel.

Humans will invent interstellar travel and make contact with other intelligent peaceful life forms.
